WHITEHEAD IS NOW IN CHARGE

Is Steering Committee For Measure Appropriating Money To State Institutions.

IMPORTANT BUSINESS TO BE DONE

Janesville Senator Given Especial Honor In This Matter By His Colleagues Who Respect His

Judgement.

Madison, Wis., Feb. 12.—To Senator John M. Whitehead of Janesville has been entrusted the work of piloting the vastly important eleemosynary appropriation bills through the legislature. These bills are the most important to be passed during the ses, sion, considering the fact that they provide for the appropriation of almost \$2,000,000 for the care and and unfortunate.

While not all the bills that have been introduced relating to the state charitable and penal institutions have been drawn and introduced by Sena-tor Whitehead, he has introduced the most important ones and those which have the greatest assurance of being enacted into law, for he is acting in harmony with and after careful consultation with the state board of control, in whose charge is the management of the state's charitable, corrective and penal institutions.

Four bills have been introduced by Senator: Whitehead which carry an aggregate appropriation for these purposes of \$1,881,825. They are as fol-

\$121,500, so that it is readily observ able that the state's expense on account of the care for the mentally unfortunate is the largest item of expense in the state government. The special appropriation bill, car-

rying \$659,325, is for the building of additions and permanent works at the institutions. The emergency appropriation of \$52,000 is largely for expenses that already have been in maintenance of the charges of the state in asylums for the insane in sity. The proposal to appropriate reformatories and prisons and in \$100,000 for the building of a hoshomes and schools for the deficient pital for the violent and criminal insane is one that has been advocated by the state board of control for years, but the state has not yet felt

able to spare the necessary money. The plan is to provide a place in connection with the northern hospit al where the most violent and dan gerous crazy people may be cared for, together with those whose mania is the taking and destroying of human life. It is found to be exceedingly unwholesome and dangerous to the other patients to have to house them in the same building and sometimes in the same wards with dangerous and violent patients, and now that the time has come of necessity for enlargement of the facilities for caring for insane, it is desired to provide a special building for these vio lent cases.

Other important bills have been introduced affecting the state institutions, one being that of Assemblyman Total \$1.881.825 Roycraft of Chipnewa Falls, to appropriate the current expense bill is the estimate of what it will actually cost to maintain the ten institutions for the Waupun. SPECIALISTS DISCUSS IN DETAIL THAW'S CONDITION

Insanity Is Nearly Proven By The Men On The Stand This Morning In The Famous Suit.

New York, Feb. 12.—Dr. B. D. Evans, the allenist, was the first witness called in the Thaw trial today. Dr. Evans declared he noticed on his visits to the Tombs that Thaw suffered from forms of insanity. He characterized this by calling it "exagger ating ego," including adolescent in-sanity, the latter due to heriditary. He said Thaw also exhibited symptoms of having recently undergone an explosive or fulminating condition

of mental unsoundness.

"Were oral statements made by Thaw the material information of your opinion as to his mental condition?" asked Delmas.

The witness said as the result of his eight examinations he had formed the opinion as to Thaw's mental condition.

Thaw showed a condition of abnor mal excitement—a diseased condition of the brain."

Dr. Evans resumed the stand this afternoon after the recess. He said as a result of his first three visits he had reached the opinion that Thaw was, of unsound mind As a result of the last five visits Evans said he had reached the opinion that Thaw's mental condition, while still impaired

DR. A. C. HARPER OF BOARD OF HEALTH TALKS.

DISEASE IN THE

And Take Part in Many Interesting Discussions on Subjects of Pro-

fesssional and General Interest. Dr. C. A. Harper of Madison, mem-ber of the state board of health, was: one of the speakers before the Central, Wisconsin Medical Society at the fore-noon session at Assembly hall and many of the facts given in his paper on "Sanitation" were of general as well as particular interest. From 25 to 35 per cent of the deaths in this state, he said, were due to bad sanltary conditions and he predicted that the time was not distant when an epidemic of typhoid fever, for instance yould be a just cause for damage suits against a city. Impure drinking water and imperfect methods of sewage disposal, as well as imperfect plumbing were discussed in detail. Vital statistics just completed showed that there had been 587 deaths from diphtheria in 21 months. The major ity of these deaths occurred in localisummoning the doctor or indifference on the part of physicians to the use of anti-toxin existed. As the use of this latter agent became more general fatalities should become practical ly nil. Already the percentage had been reduced in a few years' time from 35 to 12. Particular emphasis was laid on the

fact that all cases of tuberculosis should be reported promptly, to the state authorities, as the law requires, and that every precaution should be taken to prevent the spread of the diseases. With proper instructions carefully followed, a tuberculosis patient could be rendered practically harmless, so far as the spread of the malady was concerned but incalculable damage could be worked to the community at large if no restrictions were imposed upon them. In the city of Fond du Lac in 1905 one death out of every nine was due to this malady and in Milwaukee, 1 in every 10. The 1 in 10 per centage also obtained in Winnebago county. Thus far 459 cases had been reported this year to the state authorities and 415 of the cases were located in Milwaukee. The ravages of the disease were especially noticeable in the eastern part of the Dr. J. L. Fleek of Brodhead raised

a question as to the duties of a health officer, taking exception to a harsh letter which the board had sent to one of his fellow physicians with regard to the collection of birth statistics. Dr. Harper said in reply that the state was paying annually about \$100,000 in registration fees for births, accidents and deaths; that these statistics, if they were to be of any value, must be somewhere near complete; that the private physician as well as the health officer owed recognized duties to the state, regardless of any fees; and that if they would not fulfill these duties it was the board's duty to prosecute. Sharp letters were sent in the hope that the health officer would compet his fellow physicians to turn in these reports. If they would not do so it was his duty to trace out some of their violations of the law and report the government and assists materially them in order that action might be in opening up the country.

Lax methods on the part of an easy-going, "good fellow" physician in the placarding and reporting of scarlet fever cases in Genoa Junction recently. had led to a very unhappy climax and had cost many lives. It was very important that the state should know all about the important accidents as well as the diseases, births, and deaths. If the corn shredder was responsible for more than a reasonable number of wanted to know it, in order that restrictions might be hedged about the manufacture and operating of these machines. In less than a year there had been 12,000 accidents in Wisconsin and 3,000 of them had resulted fatally. The state authorities must understand the

main causes if anything of a remedial

nature was to be attempted.

Dr. J. A. Jackson of Madison presided at the session and there were present this morning: On. Allen Burdick of Boston; Drs. Jackson, T. W. Tormey, C. A. Harper, and C. S. Sheldon of Madison; Dr. C. New York, for the big champlonship games, so he had to be coutent with Pacific coast honors. It is understood that prominent ath-

letic followers in Portland have guaranteed Kelly's fare to the Jamestown games, and he is mapping out his training with the idea of defeating, if possible, such castern stars as Seitz, Rube Young, Robertson and Cartmell. Kelly is a student at the University of Oregon, but he has decided to give up the privilege of representing his free title to the right of running under Jamestown, It was under the Multnomah colors that Kelly smashed world's records at Spokane last spring, and Multnomah money will send him house occupied by Count Witte, the to Jamestown; hence his decision to stick to the athletic club in preference

Notwithstanding the fact that some price per pound people do not take much stock in Kelly's "nine three" record, he must be pretty near "the goods," as H. W. Kerrigan writes from Portland that Kelly did 10 seconds indoors three weeks ago and at that was nowhere near his best, He expects to beat the "nine four" route regularly when he gets going a

SELEE PRAISES ALTROCK.

is One of the Best of Modern Twirlers.

"Nick Altrock of the Chicago Americans is one of the hardest pitchers in the world to beat, because he doesn't give base runners a chance to steal on him," said Frank Selee, the former manager of the Chicago Nationals, during a fanning bee at the Western

league meeting recently.
"In the first place," said the veteran manager, "Altrock has almost perfect control. That means that you have to hit the ball to get to first. Secondly you can't steal on him, because he watches first like a hawk and has a wonderful snap throw to the base which does not permit a runner to get more than two steps away from the base without great danger of getting eaught.

"Against that kind of pitching a team is at a horrible disadvantage. You can't steal bases, and the hit and run play is easily broken up. When the runners are kept bugging first, forced plays at second base occur with greater frequency, and the infielders are given more time to pull off double plays.

"Not enough pitchers cultivate that short throw to first. There are several good left hunders who watch first as closely as Altrock, but they don't catch the runners off there, because it takes them too long to throw the ball. If they would shorten up their throw, base ranners wouldn't dare take any bigge lead off them than they do off Altrock.

ABRAHAM LINCOLN Today twelve states are commenous ating the birth of Abraham Lincoln With the exception of George Wash ington the north honors no other man by making his birthday a legal there is no reason that future generations of Americans of both north and south should not be taught of this great man. Born in a sparsely settled community, reared amid poverty and hard work, he rose to be the president of the United States at a time when a man was necessary to hold this union, the north and tho south, together. In Abraham Lincoln is typified progress. His life is an age of the best education of the time the bit. he lived in. Lincoln's father was a backwoodsman. His father fought a losing fight with adversity. The boy Lincoln had but little schooling and no powerful family influence to aid him in his start in life. He made his way to the front by his own wonder ful will power. He never was weal thy, but he was admired and loved Lincoln's heart embraced the love of the whole nation. North or south, he thought and acted in their best interests as he saw them. There was no malice in his heart towards his south ern brothers. He was broad and liberal to all. He lived in a time when men were angered with their brothers and by his judgment, his cool, concise action, his wonderful personality, he did more than any other man has ever done to make this nation one and united for ever. His untimely death at the hand of an assassin left the nation bereft of a leader at a critical period in its history, but the goodness of his works lived after him and helped to stem the tide, turning the current towards peace and harmony. His life is an example to the youth of the country, and his birthday should be

California Hucksters Chicago Chronicle: There is a principle involved in the San Francisco school matter, but the huckstering mayor and school trustees of the Cal-

The San Francisco hucksters make no pretense of patriotism, however, They demand value received. They declare. in effect, that they will concede the admission of Japanese to the public schools if the national legislature will enact(a law to keep Japanese immigrants out of the country.

This is a plain case of bargain and sale and it is rendered more sordid by the notorious fact that the demand for Japanese exclusion does not oman ate from the people of California, who need and who must have Japanese labor, but from a handful of incendiary loafers and blatherskites who have terrorized the state of California for a quarter of a century in the name of labor, This is the element which Schmitz, the discredited may-or, and his previous school trustees

We have secured by way of considerable effort and expense a list of Home Formulas, some 168 of them, from William A. Hoburs, Ph. G., Instructor in Theoretical and Applied Pharmacy at the College of Pharmacy, New York City. It is a practical collection and has been formulated by Mr. Hoburg because of the lack of useful remedies such as are constantly needed in every home. Notwithstanding the great number of medical books that cover the country, not a single one is practical for unprocessional use. Simple troubles are not dealt with and it is to cover these that Mr. Hoburg's list of careful formulas has been prepared. Each one has been worked on diligently and carefully with the result of a collection of HOME FORMULAS without equal. We will from time to time reproduce threse formulas and by clipping them out, and preserving them you can secure the choicest collection obtainable. We have the quantity for each ingredient at our store where they can only be filled. IMPORTANT-This formula will not appear again-preserve it.

Pretty Clothes for Men-Milwaukee Sentinel: Masculine butterflies of fashion who have repined because of the limited oppor tunities offered for beauty, in men's attire have been greatly cheered by hree items which have recently been given prominence in the newspapers. The first is the announcement originally made in that celebrated arbiter of fashion, the London Tailor and Cutter, that purple will be the fash-

ionable color for men's lounging and holiday suits this summer.

The next is that a strong and deermined effort is being made to induce English fashionables to discard the unhandsome trousers; which for so long have been an eye-sore to the artistic, and adopt the kilts of the

The third is that corpulent men this season will wear corsets to give o their rotund figures the suggestion of willowiness and grace that is rejuired for the graceful assumption of the long straight box coats which are to be the proper thing in the approaching season.

The announcement that purple is to be the fashionable color is indeed a joyous one. Purple is the royal ment on the sable blacks, the somber rowns, and the mournful blues and grays that we have worn for so many But the threatened introduction of

the kilt is the thing that is productive of more real bliss than any of the announcements. And if it is adopted in dear old London, it will be a matter of only a short time until it is the vogue in New York, spreading thence, like wildfire throughout the length and breadth of this dominion.

Kilts are graceful. They are said to be warm and comfortable and they are guaranteed not to bag at mees. The average man, who spends houghtful moments in contemplating the mournful humps and hummocks in his trousers, where his too per-sistent knees have set at naught the tailor's art, will welcome the kilt, for this reason, if for no other

HURLED TWENTY FEET BY TRAIN AND NOT KILLED

Fourteen-Year-Old Son of James Con Army and Slight Cuts in Accident at Noon.

Failing to hear the oncoming Chicago-bound passenger train as he was walking southward on a North-Western track shortly before one o'clock this afternoon, Patsy Condon, the fourteen-year-old son of Mr. and Mrs. James Condon of Pleasant street, was hit by the pilot of the engine and hursed a distance of twenty feet. Switchman James T. Mulligan, who was at the Five Points, only a block from where the accident occurred, rushed to the lad's assistance, picked him up and carried him home. Dr. E F. Woods was summoned by telephone and found that the left arm had been fractured near the wrist and that there was a small cut on the left side of the nose and another on one leg. These were not at all serfing at a high rate of speed the youth's escape from death was most miraculous.

A GRAND CLEAN UP OF Ready-to-Wear Garments CLOAKS, SUITS, SKIRTS

The cash in the till takes up less room than the garments on the racks. This is our excuse at this season of the year for the sweeping price reductions on **Ready-to-wear Garments**. It's a good logical excuse and when the lots offered fill your present needs, then is your opportunity to make your dollars do their full duty.

FUR COATS for WOMEN

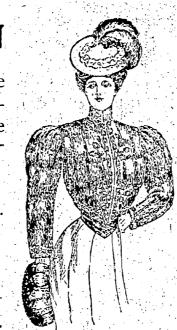

Our present stock consists of about 25 reliable fur coats as follows:—We mention the regular selling prices, at which we have held them all the season, but NOW we offer them at a REDUCTION of 8 to 30 DOLLARS.

Fine Nearseals at \$35 to \$85 sizes 34 to 46. Wool Seal Auto Coats at \$65.

One Beaver Coat, size 40 at \$125.

One Otter Coat, size 36 at \$185.

Surely a better opportunity was never present ed to purchase a nice fur coat at such a small price.

CLOTH CLOAKS

We offer all of our best garments at ½ **price.** We have but a few black cloaks left, but emphasize particularly the beautiful light cloaks, many suitable for spring wear, in tans, mixtures, plaids and checks. These desirable cloaks at ½ **price** merit the attention they are receiving.

500 SUITS BLACK MOSTLY

Never were better suits put on sale at \$5 — Women are buying them eagerly and thoroughly pleased. These suits are the same that only a few months ago were \$10 to \$18—The styles are good, simply a matter of getting fitted. Don't forget about these suits, for they are bargains worthy of the name, and will help out many a woman anxious to economize.

SKIRTS AT \$2.00

We have about 15 left, that we are closing out to make room for spring arrivals, values up to \$12.00.

PROBABLY 90 ALTOGETHER

We have two racks of winter cloaks, carried over from 1904 and 1905, cloaks for women, misses and children and during our January sale we marked them at prices ranging from \$1.00 to \$10; which were low indeed for the grade of garments. **However**, to sell out every garment before spring, as we need the room badly, we offer them now at ½ of the marked down figures. Just think of buying well made cloaks at such prices as

50c \$1.00 \$1.5L \$2.00

\$2.50 Etc

95 GRAY WOOL SKIRTS

A manufacturer had on hand a quantity of gray all wool cloths and we figured with him to make the lot up into skirts, which he did, and at a price which enables us to offer them, assorted styles and qualities, waist bands 22 to 36 inches, lengths 39 to 43 inches, \$5.75. Any woman looking for a good sensible skirt for service should remember this lot at \$5.75. Alterations free.

Satisfied customers are the best advertisement a store can have. We have made many sales on ready to wear garments through satisfied customers who have told their neighbors about the bargains they got at

From the start it seemed evident that success would be the result, as they were agreeably, eccived by all classes and abundantly blessed financially. Their ability in this direction has been amply proven. In this connection we venture to say that no one contributed more ably or zealously than Father James Condon of Edgewood Villa, Wis., who in a sacrificing manner gave many of his best days building up and holding the interest of the ther. fast enough, never fear. I suppose you pine for a little human society now and then. A man can never strike the right medium in such things. In New York we are all rushed to death. I sometimes feel that I'd like a little rustication myself. I get nervous, and working for corporations is wearing. The old gentleman there is Taylor, president of the Mid-Western and Southern. The ladies are his wife and a friend of hers. I'd like to introduce you." He ran his eyes over my corduroys and leggings in amiable acceptance of my rusticity. He had not in years addressed me so pleasantly.

Stoddard had left me to go to the other end of the platform to speak to some of the students. I followed Pickoring rather reluctantly to where the companions of his travels were pacing to and fro in the crisp morning air. As soon as Pickering had got me

well under way in conversation with Taylor, he excused himself hurriedly and went off, as I assumed, to be sure the station agent had received orders for attaching the private car to the Chicago express. Taylor proved to be a supercilious person,-I believe they call him Chilly Billy at the Metropolitan club,—and our efforts to converse were pathetically unfruitful. The two ladies stood by, making no concealment of their impatience. Their eyes were upon the girls from St. Agatha's on the other platform, whom they could see beyond me. I had jumped the conversation from Indiana farm values to the recent disorders in Bulgaria, which interested me more, when Mrs. Taylor, ignoring me, spoke ab-

"That's she—the one in the gray coat, talking to the clergyman. She came a moment ago in the carriage.'

"The one with the umbrella? I thought you said—"

Mrs. Taylor glanced at her sister warningly, and they both looked at me. Then they detached themselves and moved away. There was some one on the farther platform whom they wished to see, and Taylor, not understanding their maneuver-he was really anxious, I think, not to be left alone with me-started down the platform lafter them, I following. Mrs. Taylor and her sister walked to the end of the platform and looked across, a biscuit toss away, to where Stoddard stood talking to the girl I had already theard described as wearing a gray coat and carrying an umbrella.

The girl in gray crossed the track quickly and addressed the two women cordially. Taylor's back was to her and he was growing eloquent in a mild well-bred way over the duliness of our statesmen in not seeing the advantages that would accrue to the United States in fostering our shipping industry. His wife, her sister and the girl in gray were so near that I could hear plainly what they were saying. They wore referring apparently to the girl's refusal of an invitation to accompany them to California.

"So you can't go-it's too bad! We had hoped that when you really saw us on the way you would relent," said Mrs. Taylor.

"But there are many reasons: and above all Sister Theresa needs me.' it was the voice of Olivia, a little lower, a little more restrained than I had known it; but undeniably it was

Nervous Indigestion

The action of digestion is controlled by nerves leading to the stomach. When they are weak, the stomach is deprived of its energy. It has no power to do its work. If you want permanent relief, you must restore this energy. Dr. Miles' Nervine restores nervous energy, and gives the organs power to perform their functions.

"For many years I was an acute sufferer from nervous indigestion; at times I was so despondent life seemed almost a burden. I tried all kinds of remedies and various physicians with little or no relief, until ohe night last summer I saw Dr. Miles' Nervino and Heart Cure advertised. I resolved to make one more trial which I did in the purchase of one bottle of Nervine and one of Heart Cure. In a few days I began to feel better, which encouraged me so much that I continued the medicine until I had taken more than a dozen bottles. I am very much improved in every way, in body, mind and spirits since. I make a special point to recommend the medicine, and I feel a sincere pleasure in knowing that several persons have been benefited through my recommendations."

Tobacco Smcke Scared Deer

A new way of preventing deer from doing damage to a holding has been cared for my acquaintance—as Olivia adopted by the occupier of Haddon farm, in the heart of the Devon and Somerset staghound country, in England.

. Discarding the use of tarred ropes and other strong smelling materials in fences, he walks through his turnip fields two or three times a night, smoking a strong pipe, the smell of which, he says, frightens the deer away. Before he adopted this device his farm used to be visited by scores of deer nightly.

Lake of Washing Material.

Near Ashcroft, in British Columbia, are a number of small lakes, whose shores and bottoms are covered with a crust containing borax and soda in such quantities and proportions that when cut out it serves as a washing compound. The crust is cut into blocks and handled in the same manner as ice, and it is estimated that one of the lakes contains 20,000 tons of this material.

GRAZING CONTROL 🕶

PUBLIC HEARING BEFORE THE SENATE COMMITTEE.

LETTER FROM PRESIDENT

Cattlemen Favor Amendment, Admit ting Their Violations of Fencing Law-Opposed by the Sheepmen.

Washington, Feb. 12.-Government policy in regard to the control of grazing land in the public domain and the interests of large and small cattlemen and the sheepmen, and the effect of protection of stockmen upon the homesteaders, were considered Monday at a public hearing before the senate

committee on agriculture. The hearing was had on an amendment by Senataor Burkett of Nebraska to the agricultural appropriation bill, authorizing the secretary of agriculture to district the unreserved lands of the United States and charge and collect reasonable fees for grazing. The cattlemen were represented by a number of members of the American National Livestock association and spoke for the measure, while the sheepmen, represented by members of the National Wool Growers' association, opposed the policy proposed. During the proceedings a letter from President Roosevelt addressed to Senator Warren, was read. It indorsed the policy of general control by the government of all grazing land, but insisted upon the protection of the homesteader, and it arraigned the sheep men severely.

Cattlemen Violate the Laws. The cattlemen and sheepmen criti cised each other and defended their own motives. The cattlemen made no defense of the charges that they had been violators of the law, and the sheepmen asserted that it was necessary for fencers of public lands to make their peace with the government for "they would be convicted i ewer brought to trial."

A. E. De Ricqueles. American National Livestock as sociation, outlined the position of \the cattlemen in favor o government control, and then called upon individual cattlemen for statements. J. M. Boardman of Helena Mont., asserted that every cattleman had violated laws in regard to fencing. Why, if you want to get the list of violators; just take the membership of the Cattlemen's association," he "Including yourself?" asked said. Chairman Proctor. "Yes, sir; but I have taken my fences down," replied Mr. Boardman. He added that he had fallen into political disfavor. He recommended government control of grazing.

Must Fight Sheepmen. T. W. Gray, of Gunnison, Col., spoke as to the leasing system, in order to protect small raisers of cattle in Colorado against. Utah sheep raisers bringing in large flocks that quickly reduce ranges to a condition where cattle starve. "We have to fight these sheepmen or get nothing," he said. "Which do you do?" asked Senator

"Ask the criminal courts of Color ado," replied Mr. Gray, and he added "Why, we fight them, of course."

He described the high ranges in Colorado as ideal for the small cattlemen. "With the sheepmen barred? suggested Senator Dolliver.

The witness replied smilingly that "the altitude is too high for sheep." He was asked about the unwritten law governing the amount of range land a bona fide settler might use. He said the only unwritten law in his sec | La Crosse since 1851, and was widely tion concerned the number of sheep that might be brought in from other sections.

"What is that limit?" asked Senator Dolliver. "Well," he replied, "10,000 head dropped in at once. But the sheepmen

did not take that many away again. TRAIN ROBBERS ARE CAUGHT.

Declares Exclusion of Coolies Has Not Been Discussed-Cabinet to Consider the Question.

Washington, Feb. 12.-As a result of an hour's conference at the White House Monday afternoon at which President Roosevelt, Secretary Root, Mayor Schmitz of San Francisco and the members of the school board of that city participated, Mayor Schmitz late Monday night' made a statement summarizing the situation.

When asked the direct question whether the proposition submitted by the San Francisco delegation called for the exclusion of Japanese coolie labor from this country, Mayor Schmitz replied:

"We are not making a treaty and have not discussed with the president the question of excluding the Japanese from this country by treaty. On Saturday we heard the president's views, and to-day we presented our side of the questions at issue. It now remains for us to modify our views in order to reach an agreement with the president, or for Mr Roosevelt to modify his views to reach an agreement with us. To'day's conference adjourned subject to the call of the president, and I do not believe that we will be called to the White House again until Thursday or Fri

It has been agreed that the whole matter will be considered at the cabinet meeting Tuesday. Mayor Schmitz declined to say whether the question of excluding the Japanese coolies by congressional legislation formed a part of their proposition, which was submitted to the president Monday in writing. Mayor Schmitz and other members of the San Francisco delegation have received hundreds of tele grams urging them to advocate a treaty excluding the Japanese laborers and legislation by congress to carry the provisions of this treaty into ef-

SALTON SEA TO DRY UP.

Last Break in Colorado River Is Shut Off.

Imperial Cal., Feb. 12.-The last water coming through the break in the Colorado river was shut off Monday morning after a long and hard struggle by the Southern Pacific Railroad company. The levees have been put in good condition several miles below the break and are being extended rapidly with the aid of hundreds of men and teams. The New and Alamo rivers, carrying water from the Colorado to the Salton sea, are rapidly go ing dry in the valley.

It is expected that Salton sea will now fall steadily and will fully disappear through evaporation in about ten The floods have caused little actual damage to the cultivated lands of the valley.
